**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: As to claims 34 - 67, the prior art does not show or teach triggering the triggerable A/D converter at an nth integer fraction of the frequency, the n being selected as a function of the fault frequency which is obtained as the quotient of the speed and width of the probe as recited in the claims and in combination with the other features of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US6566871 and US4083002 both teach apparatus for detecting features of a passing material under test. US5570017 teaches an apparatus for testing passing material wherein the frequency of operation is dependent of the speed of the passing material. US4651091 teaches a control apparatus having a triggerable A/D converter.
